

Fortress Stainless Steel Modular Wall System Pharmacy USP 797 / 800 / 8XX Upgrades

mfPHD manufactures and installs the Fortress Stainless Steel Modular Wall System for high sterility environments. The modularity of the Fortress system offers hospitals a durable & flexible antimicrobial wall surface that shortens construction times.

Rated "Best In Class" USP 800

- Meets USP 797/800 guidelines
- USP 8XX (future guidelines) can be easily met
- Shorten construction schedule by weeks, occupy space sooner
- Leave walls open 30-40 days longer & minimize change orders from contractor
- Great for renovations or new builds
- System can mount to face of stud or over drywall
- Brushed Stainless or any color finish to meet desired aesthetics

Walls are removable for fast and easy infrastructural and mechanical modifications. This allows facilities to make changes and meet future guidelines with minimal time and construction costs.
